

Product Overview: The first 'intelligent electric care shower' designed for safety and accuracy providing peace of mind for users of all abilities.

- Features:**
- The thermostatic controls can be easily digitally set to 3 max operating temperatures, 41°C, 43°C or 46°C to suit individual user requirements
 - 1 metre long riser doubles as a grab rail
 - Distinctive tear shape gives more space for the seated user, as well offering a modern soft silhouette ideal for any bathroom
 - Automatic shut off after 30 minutes for safety and water efficiency
 - Integral double check valve ensure the elimination of backflow and contamination of water
 - Temperature is regulated to +/- 1°C of the set temperature even during fluctuations in pressure
 - 3 different spray patterns can be easily selected using the ergonomic easy grip shower head
 - 10kW power gives consistent all year round reliable performance
 - Direct connectivity to all AKW waste pumps
 - The additional shower bracket provided is ideal to accommodate the seated or standing user giving greater flexibility

- Benefits:**
- Fluted easy grip grab riser rail provides extra support up to 190kg
 - 2 metre extra long hose supplied as standard giving greater flexibility and enabling easy carer use
 - Standard high contrast tactile shower control buttons improve navigation and make Luda[®] easy and safe to use
 - Push button easily adjustable shower head, soap dish and shelf for greater comfort and easy reach
 - High contrast blue riser grab rail available for users with limited visibility
 - Individual flow and temperature buttons indicated by illumination and audio recognition offer the user individual control over the shower giving additional independence and peace of mind and help to save money
 - The Luda[®] runs on for 30 seconds after shut down, expelling all water in the unit avoiding stagnant water and lime scale build up

Approvals:

BEAB and BEAB Care approval are the most stringent and exacting standards a care shower can uphold.

This ensures that additional performance requirements are met to be suitable for Hospitals, Care Homes, Hotels and residential care facilities.

The Luda[®] shower is approved by and has been developed alongside the RNIB.

This guarantees that the design is easy to use for the blind or partially sighted.

Large high contrast tactile buttons, audio recognition and safe thermostatic control offer the user a superior showering experience.

kiwa
approved
product

Luda[®] is a KIWA approved product.

Luda[®] is a WRAS approved product.

The shower also holds an IP rating of 45, one of the highest for dust/water ingress on the market.
