

## Product Overview

AKW EnviroVent Filterless Extractor Fans are versatile, discreet solutions for efficient air ventilation which have been designed for installation in a range of high-humidity areas around the home, including wet rooms, bathrooms and kitchens.

## Features & Benefits

- + Powerful backward curved EC motor vastly reduces moisture levels and condensation, contributing to the prevention of mould growth
- + Intuitive Intellitrac® controls constantly monitor humidity levels, requiring no user intervention
- + IPX5 rating ensures fan can be safely installed and used within Zone 1
- + SELV (Safety Extra Low Voltage) protection ensures fan can be used in areas with high humidity and in close proximity to water
- + Energy-efficient solution with an advanced ultra-low-watt brushless EC motor that achieves exceptional energy use levels – up to 80% more efficient than a traditional AC fan, delivering powerful results with minimal energy usage
- + Delivers high, reliable performance which exceeds building regulation requirements
- + Simple to maintain, repair or replace parts, with low lifetime costs
- + Designed to operate quietly and efficiently
- + Discreet exterior aesthetic which is also easy to clean

## Warranty & Approvals

## Technical Specification

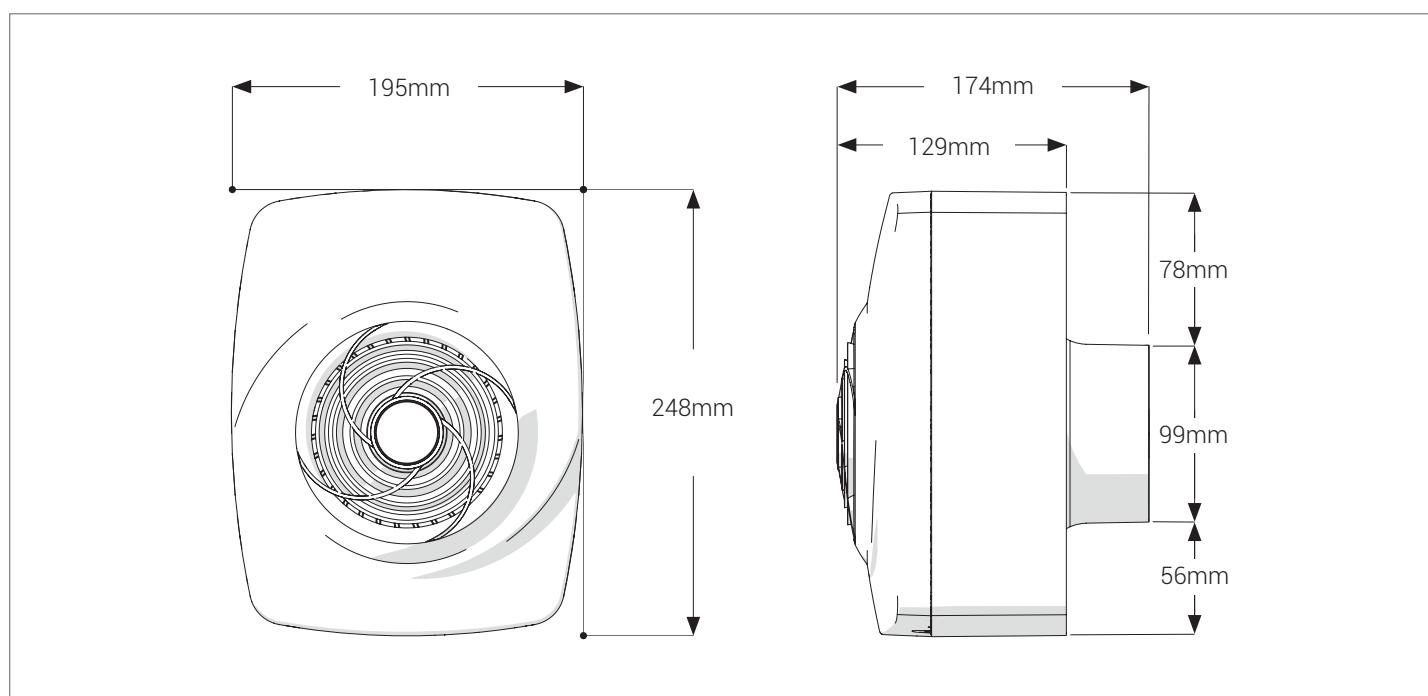

- + IPX5 Rating - SELV
- IPX4 Rating - Mains
- + 230V mains or 12V SELV (Safety Extra Low Voltage)

## Bathrooms - Airflow Performance\* - SELV

Settings	Power (W)	Duty (L/S)	Sound db (A) @ 3m
Bathroom Trickle	3	13	15.46
Bathroom Boost	9.5	37	40.56

\*Performance under free air condition (0Pa).
