Stainless Steel Grab Rails

INSTALLATION INSTRUCTIONS

Please read all instructions before installation and leave this document
with the end user for future reference as it contains important warranty information

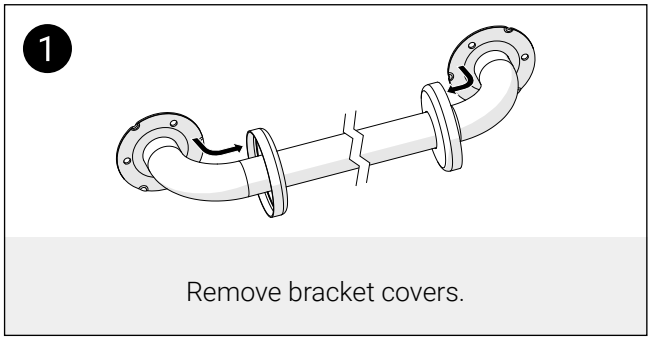

Important Information & Installation

Installation must be carried out in accordance with these instructions, and must be conducted by a competent installer.

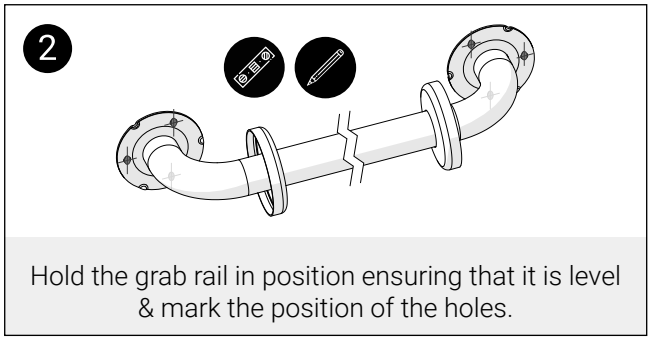

Important
Before fixing anything to the walls, ensure that the construction of that wall type is capable of the maximum weight of the loaded unit and that the appropriate fixings and fixtures are used for that wall type. Wall fixings are not supplied.
It is recommended to use all fixing holes on the bracket.
Do not use countersunk screw fixings.

Before you start
Please remove any protective covering and examine carefully. Check that all items are present before discarding of all packaging. Please notify the retailer immediately of any damage or faults. The manufacturer cannot be held responsible for any installation costs that may arise from damaged or faulty products being installed and not in accordance with these instructions. Keep small parts and packaging away from children and dispose all packaging in accordance with the local recycling authorities.

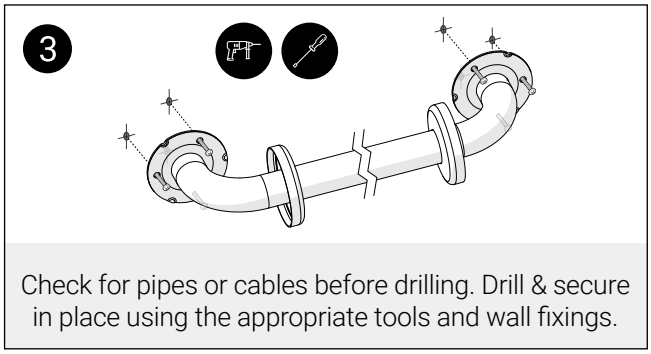

For stainless steel grab rails with **two wall brackets** please follow the instructions below:

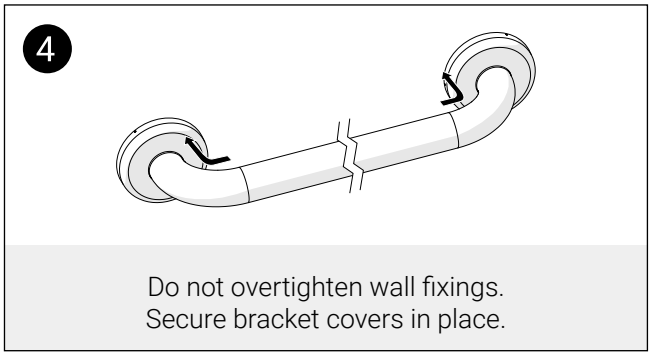

Remove bracket covers.

Hold the grab rail in position ensuring that it is level & mark the position of the holes.

Check for pipes or cables before drilling. Drill & secure in place using the appropriate tools and wall fixings.

Do not overtighten wall fixings.
Secure bracket covers in place.

For grab rails with **three or more wall brackets:**

Corner grab rail - start by installing the corner elbow moving outwards, always making sure the rail is level.
Other grab rails - start by installing the elbow(s) from the middle outwards, always making sure the rail is level.
