BATHROOMS

Where your bathroom story begins

Pause a moment and think about what you're looking for in the perfect bathroom: Beautiful clean lines. Effortlessly chic, contemporary styling. A stunning high quality finish. And unbelievably good value.

Now you're imagining your Essential Bathroom.

And with our extensive range, you're bound to find the perfect products for your bathroom and your lifestyle.

Our Comfort Height toilets feature pans that are 17" to 19" high, compared to the standard 15" of a regular toilet. The higher pan height can be good for the knees and back and offer real advantages to the tall, elderly and people with mobility problems.

Look out for our Rimless toilets for easy cleaning and peace of mind that your toilet is as germ-free as possible.

See our glossary on P63 for more details.

# Baths

Now you've chosen your suite, it's time to think about a bath: Something that complements the style of your new suite but looks eye-catching by itself. With our range of single-ended, double-ended, square or curved baths, you're sure to be able to find the style you're looking for.

In addition, we now have Essential Quartz models – designed to provide improved durability and heat retention, keeping your water warm for longer; plenty more time to enjoy a relaxing soak. See below for more details.

## Features:

- Made from 5mm Lucite® acrylic
- Supplied with leg sets
- Encapsulated base boards for extra strength and rigidity
- Reinforced Quartz options available
- Single ended or double ended to suit your plumbing
- Range of size and style options
- Lifetime guarantee on baths
- 1 year guarantee on panels & feet
- Supplied without tap holes so you can decide where your brassware fits
- Nevada, Vermont and Hampshire furniture panels available

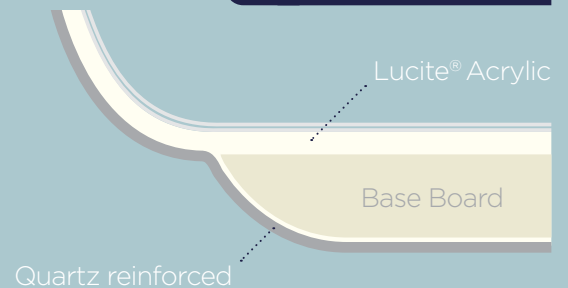

## What is Quartz?

To ensure an even finish, the coating is applied by hand to the finished bath – assuring a quality product every time

Coating retains heat for longer than the acrylic on a standard bath

The special Quartz coating provides increased strength and durability to the acrylic

# Inspiration

It's important to think about your bathroom before you purchase your suite, bath, brassware and accessories. Who's going to use it? How much use will it get? Layout is just as important: Are you replacing a current bathroom or are you hoping to redesign and re-plumb your bathroom space?

## Best for smaller spaces and families

In a smaller space or a family bathroom, storage is at a premium. Make the most of wall space with floating shelves or hooks.

You can also have a smaller bath fitted – a 1500 or 1600mm – and then get extra storage built in to the remaining space. Don't forget that smaller, space-saving towel warmers are perfect for odd-shaped or unused wall spaces, and wall-mounted accessories help keep floor-space clear.

## Best for darker rooms

Light and brightly coloured walls are more reflective, making any space feel open and airy. Additionally, light colours help enhance the effect of natural light (which we all love). As such, paint your bathroom cream, icy blue or other soft variations of green and blue.

## Eye catching style

If you've got the space, choose a freestanding bath to create a focal point in your bathroom. Think about the decorating as well: A vertical row of feature tiles directly down the centre of the wall above your bath, especially when surrounded by white or pale tiles, can really influence where the eye is drawn to. Perfect if you're on a tighter budget.

# Glossary

**BTW or Back to Wall:** The toilet cistern is concealed behind the pan within a piece of furniture or false wall. This can create a handy shelf behind the pan.

**Fully Back-to-Wall:** The back of the pan fits flush against the wall, concealing the pipes. However, it makes it much more difficult to attach a waste pipe that doesn't come from directly behind the pan. Box section may then have to be built around the back of the toilet to cover pipework.

**TH or Tap Holes:** One or two? This depends on what type of brassware you want. One tap hole is great for minimalist designs. Two tap holes are better if you want a separate hot and cold tap.

**Open-Back:** An open back pan will allow for a side entry waste pipe as no concealed wall is in the way during installation. However, an open-back, means that the waste and connection can be seen and may not suit the modern look of a bathroom.

**CC or Close-coupled:** The cistern is fitted directly to the pan so that it becomes a complete unit, avoiding the need for visible connection pipes.

**Thermostatic or not:** Whilst static valves are often cheaper, thermostatic valves allow you to vary the temperature of the radiator depending on the time of year or how you feel, completely separately to the rest of your radiators.

**Quick-release seat:** These seats are perfect for keeping your toilet spotlessly clean and hygienic. With a convenient button located at the back of the seat, it can be removed from the toilet altogether and cleaned separately and then conveniently reattached.

**BTUs:** A BTU, or British Thermal Unit, is the amount of heat required to heat the water in a radiator. The amount of BTUs you need depends on the size of your bathroom, and the amount of BTUs generated depends on the size of your radiator. As a rough estimate, for every 1m<sup>3</sup>, you'll need approx. 125 BTUs. Measured against T50 - European Standard.

**WRAS approval:** Any water fitting must comply with the Water Supply (Water Fittings) Regulations or Scottish Byelaws. These require that a water fitting should not cause waste, misuse, undue consumption or contamination of the water supply and must be 'of an appropriate quality and standard'. WRAS approval is the test that confirms the water fittings comply and are best for your home.

**Dual Flush:** Dual flushes help to make your cistern more efficient, reducing water usage by up to 50%, which will save you money and help the planet.

**Semi-recessed basin:** If your bathroom or en-suite has limited space then a semi-recessed basin might be the solution you need. If placed on cabinets, the basin front can sit proud, meaning your cabinets can be shallower and take up less space in the bathroom.

**Rimless:** In simple terms it allows your toilet pan to flush without a rim, thus making the whole surface easily cleanable. This unique system gives a genuine peace-of-mind that your toilet is as germ-free as possible.

**Comfort Height:** Our comfort height toilets feature pans that are 17" to 19" high, compared to the standard 15" of a regular toilet. The higher pan height can be good for the knees and back and offer real advantages to the tall, elderly and people with mobility problems.
