Andris Lux

The Andris Lux is the UK's No.1 electric water heater of choice. It encompasses Italian design, energy efficiency, durability, usability and safety, and is available in various models including 6, 10, 15 & 30 litre variants as well as undersink and oversink versions.

- / Modern, cutting-edge and stylish design
- / Easy to operate with mechanical dial
- / 'E' setting on the dial to optimise comfort and energy saving
- / Copper heating element (Nickel free)
- / Titanium enamelled tank and 4-bolt flange for robustness and durability
- / Heating lamp to show the heating cycle is in process
- / Fast reheat times
- / Installation in 10 easy steps

^{*} Including Kits A, B & C

In order to fit an ariston Andris Lux it is good practice and sometimes mandatory to install one or several of the following kits:

KIT A

Expansion Vessel & Non-return Valve

An expansion vessel is a device that takes up the expansion of water in the domestic hot water system when it is heated. This prevents build up of excess pressure. The non-return valve prevents backflow of expanded hot water in to the cold water main.

Product Code: 406801

KIT B

3.5 Bar Pressure Reducing Valve

The maximum cold water inlet pressure designed for the Andris R unit is 3.5 bar therefore this pressure reducing valve controls the water to not exceed this limit.

Product Code: 406802

KIT C

Discharge Tundish

In the event that the hot water system over pressurises, the highly pressurised water is discharged via the 6 bar pressure relief valve and the tundish serves to visually indicate that this discharge is occuring.

Product Code: 406807
