Specifications

Inlet Water Temperature

Maximum Hot
65°C

Dynamic Water Pressure

Min: 0.3 bar

Max: 5.0 bar

Maximum Static Pressure: 10.0 bar

Inlet Connections

1/2" BSP
Flexible Tails
with Isolation
Valves

Non-Return
Valves
Included

Tools You'll Need

Adjustable Spanner

EasyFit Tool

Hexagonal Key

Crosshead Screwdriver

Spare Parts

To replace any spare parts
for your tap, why not
scan the QR Code or
visit www.bristan.com
and search for your product.

Prior to Installation

All products manufactured and supplied by Bristan are safe provided they are installed, used correctly and receive regular maintenance in accordance with these instructions.

This product has been tested to the Water Regulations Advisory Scheme (WRAS) and satisfies the requirements of the Water Supply (Water Fittings) Regulations 1999 and current bylaws. For full Installation Requirements & Notes (IRN) please visit wras.co.uk/directory.

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

Before installing these taps the water supply must be thoroughly flushed in order to remove any swarf, solder etc.

This product must not be modified in any way as this will invalidate the guarantee.

Flexible Connecting Pipes

Pack Contents

Installation

Remove the protective cap
from the base assembly.

1

Feed the base
through the
sink hole from
the top.

If the surface the tap is being fitted to is over 8mm;
or you feel the tap needs extra stability, follow the
alternative installation steps overleaf.

2

Drop the Plain Inlet
Connector into
the base.

REMEMBER

Make sure the
base is centralised
when viewed from
the front of
the tap

Ensure flat area of the
plain inlet connector
sitting flush adjacent to
threaded inlet connector

3

Turn the hexagonal
key clockwise until
the base is secured.

4

REMEMBER
hot on the
left, cold on
the right

Screw the
flexible tails
into the base.

DO NOT
OVER-TIGHTEN

5

Connect
the hot and
cold water
connections.

Olive

Compression
Nut

6

Grease the
O-Rings using the
Molykote Grease
provided.

7

Place your
desired tap
onto the base.

IMPORTANT
Ensure the
tap is correctly
positioned and
fully located on
the base

8

Secure in place with the
grub screws using the
tool provided.

9

Thread the
hexagonal key
through the EasyFit
tool and tighten the
grub screws with an
extra 1/2 turn

Your tap is now
ready to use.

General Cleaning

Bristan products are made from premium materials, with hand polishing and electroplated finishes.

Your taps or shower should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toiletries etc. should be rinsed off straight after use.

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

Some surfaces such as nickel and pewter may be affected by the dye found in some cloths, so it is also important to avoid hanging cloths on spouts.

Operation

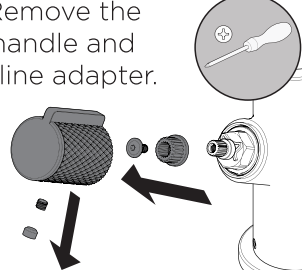

Maintenance - Cartridge Removal/ Replacement

1

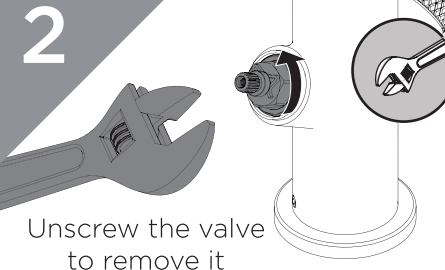

IMPORTANT
Isolate the water supply before starting!

Remove the handle and spline adapter.

2

Unscrew the valve to remove it

3

Scan the QR Code and search for your product code to replace the cartridge for your tap.

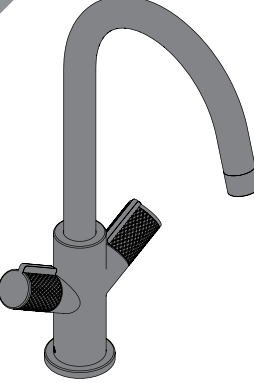

4

Reverse the steps to replace the valves and handles.

5

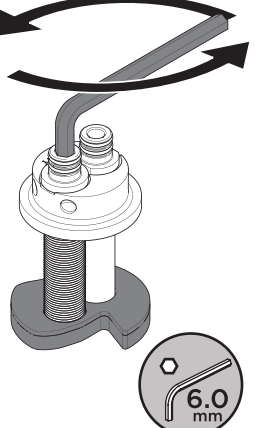

Turn on the mains water supply, letting the water flow for a few minutes to flush through the system.

Alternative Installation for Surfaces Out of Tolerance/Extra Stability

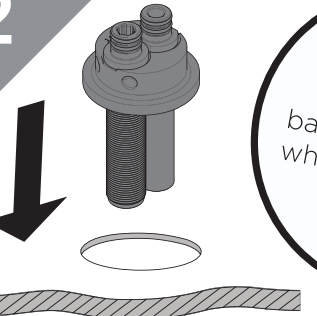

1

Turn the hexagonal key anti-clockwise to remove the back nut from the EasyFit Base.

2

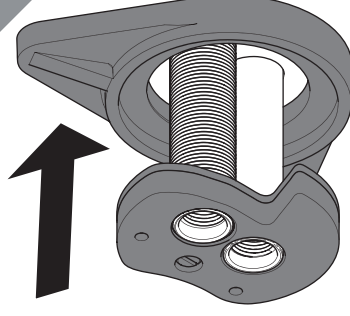

Feed the base through the sink hole from the top.

3

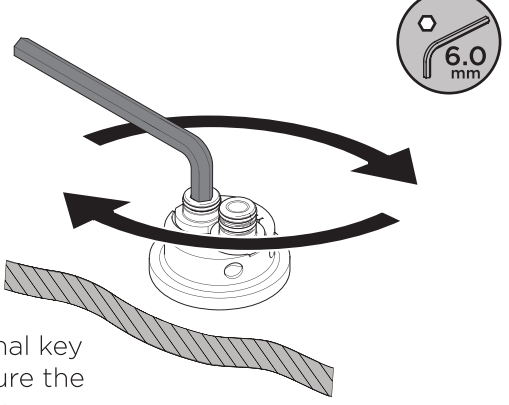

REMEMBER
Make sure the base is centralised when viewed from the front of the tap

Feed the Reinforcing Plate (if required) and Back nut up to the underside of the sink.

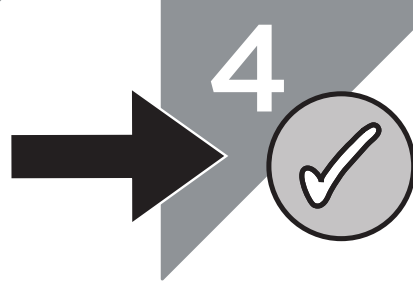

4

Turn the hexagonal key clockwise to secure the EasyFit Base.

5

Proceed to Step 4 of the Installation Steps.

Troubleshooting

Symptom	Cause(s)	Remedy
No flow or low flow rate	Partially closed isolation valve.	Open isolation valve.
	Head of water is below the minimum distance required.	Refer to your specification for the minimum working pressure/ distance required
	Hot or cold water being drawn off elsewhere causing pressure changes or instantaneous boiler temperature changes.	Do not use other water outlets when using the taps.
	Airlock or partial blockage in the supply pipework or hoses.	Flush through pipework to ensure removal of debris and any airlocks.
	Water supply failure	Investigate water supply. Check your plumbing and heating systems for any faults.
Water dripping from taps	This is normal for a short time after using the taps.	This is caused by residual water tension, the build up of water in the tap body.
	If water continues to drip, possibly due to the ceramic disc valves/cartridge	Refer to the Maintenance section to replace the valves/ cartridge.
Taps do not turn on	Closed isolation valve.	Open isolation valve.
	Mains water supply turned off.	Turn on mains water supply.
Wobbly Tap	Grub screws are not tight enough at the base	Ensure the grub screws are fully tightened against the base
	Extra security may be required depending on the surface the tap is fitted on to.	Refer to the Alternative Installation steps in order to fit the Reinforcing Plate.

Maintenance - Cleaning/Replacing Outlet

1

Unscrew the aerator housing.

2

Remove the aerator from housing. Clean and replace as necessary.

3

Secure the aerator. Turn on the mains water supply, letting the water flow for a few minutes to flush through the system.

At Bristan, we want to make things as easy as possible for our customers. That's why we offer solid guarantees on all our products, effective from the date of purchase, to give you peace of mind.

To start your free guarantee simply scan the QR code and register your product. Alternatively visit www.bristan.com/register.
