

## A modern bathroom interior featuring a white bathtub with a black and white striped towel draped over the edge. A black-framed glass shower enclosure is installed over the tub, equipped with a rainfall showerhead and a handheld showerhead. The walls are covered in large, white square tiles. A built-in shelf above the tub holds a soap dish and a bottle. A hanging plant is visible in the top left corner. A black radiator is partially visible on the right side.

# INTRODUCTION

Welcome to the latest edition of the Essential Bathrooms collection.

Creating your ideal bathroom doesn't need to be overwhelming, whether you are looking to completely renovate your space or just update your existing room, the Essential Bathrooms collection has everything you need to get started.

Icons are at the bottom of the product pages to help you to see at a glance the technologies & functions that our products include. Product guarantees are listed in the Features section on each range.

There is also a Glossary section at the back of the brochure on page 91 to help you with the terminology used throughout the brochure.

## Highlights

We have extended our furniture range Montana, see page 23.

For our new range of steel baths, see page 60.

See page 66 for the new additions to our bath screens.

# INSPIRATION

Feel inspired by the stylish and distinctive Colorado bathroom, one of our newest furniture collections. Complement this vision of style with one of our Spring Wetrooms. Featuring a sleek and luxury look, whilst ensuring practicality is at the forefront.

Complete your dream bathroom with a luxurious Straight Matt Black towel warmer and elegant Francis Pegler brassware.

## BTW

The toilet cistern is concealed behind the pan within a piece of furniture or false wall. This can create a handy shelf behind the pan.

## Fully Back-To-Wall

The back of the pan fits flush against the wall, giving your bathroom an elegant, modern look whilst concealing the unsightly waste pipes and water inlets from view.

## Open-Back

An open back pan will allow for a side entry waste pipe as no concealed wall is in the way during installation. This configuration is suited for pipework which doesn't come directly from behind the pan

## CC or Close-Coupled

The cistern is fitted directly to the pan so that it becomes a complete unit, avoiding the need for visible connection pipes.

## Dual Flush

Dual flushes help to make your cistern more efficient, reducing water usage by up to 50%, which will save you money and help the planet.

## Quick-Release Seat

These seats are perfect for keeping your toilet spotlessly clean and hygienic. With a convenient button located at the back of the seat, it can be removed from the toilet altogether and cleaned separately and then conveniently reattached.

## Rimless

In simple terms it allows your toilet pan to flush without a rim, thus making the whole surface easily cleanable. This unique system gives a genuine peace-of-mind that your toilet is as germ-free as possible.

## Comfort Height

Our comfort height toilets feature pans that are 17" to 19" high, compared to the standard 15" of a regular toilet. The higher pan height can be good for the knees and back and offer real advantages to the tall, elderly and people with mobility problems.

## BTUs

A BTU, or British Thermal Unit, is the amount of heat required to heat the water in a radiator. The amount of BTUs you need depends on the size of your bathroom, and the amount of BTUs generated depends on the size of your radiator. As a rough estimate, for every 1m<sup>3</sup>, you'll need approx. 125 BTUs. Measured against T50 - European Standard.

## Thermostatic or non-thermostatic

Whilst non-thermostatic valves are often cheaper, thermostatic valves allow you to vary the temperature of the radiator depending on the time of year or how you feel, completely separately to the rest of your radiators.

## WRAS approval/Unified Water Label

Any water fitting must comply with the Water Supply (Water Fittings) Regulations or Scottish Byelaws. These require that a water fitting should not cause waste, misuse, undue consumption or contamination of the water supply and must be 'of an appropriate quality and standard'. WRAS approval/Unified Water Label is the test that confirms the water fittings comply and are best for your home.

## TH or Tap Holes

One or two? This depends on what type of brassware you want. One tap hole is great for minimalist designs. Two tap holes are better if you want a separate hot and cold tap.

## Semi-Recessed Basin

If your bathroom or en-suite has limited space then a semi-recessed basin might be the solution you need. If placed on cabinets, the basin front can sit proud, meaning your cabinets can be shallower and take up less space in the bathroom.

## Supermatt finish

An extremely robust anti-fingerprint and anti-scratch technology Serica finish from Alfa-foils with the added benefit of thermal healing of micro scratches.

## Flow restrictor

A flow restrictor regulates and limits the flow of the tap or shower to save water consumption.

## Water pressure

The flow of water from the tap is determined by water pressure. This is the force in which the water is being pushed through the pipework. Water pressure is generally measured in "bars".

## Single Flow

Single flow taps allow the hot and cold water to mix within the body and spout, creating a mixed temperature and a better flow rate.

## Gloss polyurethane finish

Gloss polyurethane top coat helps retain the furnitures colour and gloss for longer.
