

TWISTO

Ø 90 SHOWER WASTE

Twisto has the unique feature which provides a 50mm water seal on a waste with a Fast Flow, vortex operation that is effectively self-cleaning and 'uncloggable' in normal use.

This is why it is popular for wet rooms and under grids where access may be limited, such as the application I believe you are looking at. Effectively you get a lot of features in the waste quoted to Merlyn. For peace of mind, we sell literally thousands of these and are non-problematic in use.

Please note the product specification section describing the self-cleaning feature and vortex design. We test each item before despatch.

> **5 years guarantee** : It is the proof of an outstanding level of quality.

> **Innovative vortex design** : This self cleaning system provides a lifetime maintenance free usage.

> **Wirquin waterproof guarantee** : It is the most reliable installation solution thanks to the Wirquin Pro overlapping washer design. This certification ensures a 100% factory waterproofness quality control.

> **Autocentered overlapping washer** : It is a time saving solution which automatically centers the washer to avoid any installation mistake.
