

## Installation Guide

# 2 Panel Hinged Bath Screen

### Important

Please familiarise yourself with the fitting instructions before commencing fitting.

1. Check that you have the tools required.
2. Check that the installation site is compatible with size of screen supplied
3. Check all the screen components.
4. Check that the installation kit is complete

**DO NOT attempt** to install the product unless you can tick ALL 4 boxes as satisfactory.

The wall plugs supplied with the installation kit are for use in solid walls. Hollow or 'stud-partition' walls will require alternative fixings. Please consult a hardware supplier for the correct type.

It may also be necessary to consult your tiling supplier about the correct method for drilling your tiles.

**USE SAFETY EYEWEAR WHEN DRILLING**

Any parts missing or damaged must be reported to your supplier within 5 days of purchase. Inspect shower enclosure before fitting . No claims will be acceptable after product has been installed.

8	Flat head screw ST4x30	3	A2403001	16	Cover cap for hinge	8	M7012

## FIXING KIT COMPONENTS, TOOLS REQUIRED, SITE

Fixing Kit components  
parts shown are not to scale

### Tools Required

- 6mm masonry drill bit
- Spanner
- Power drill
- Quality Silicone
- Pencil
- Tape Measure
- #2 Philips Head screw driver
- Spirit level with horizontal and vertical level indicators

### IMPORTANT - Installation site

1. Ensure your bath is level before fitting. This screen is not designed to fit on baths with stepped fronts, roll top rims or integral soap dishes.
2. The tiling or other wall finishing should be effectively sealed at the tray edges.

# INSTALLATION

**FIG 1**

**FIG 2**

**FIG 3**

1. Position the wall profile so the seal on the moving panel sits on the inside edge of the bath. **Fig 1.**

2. Plumb the wall profiles using the vertical element of the spirit level. Mark 3 holes, drill with 6mm masonry bit and fit wall plugs. Using the 3 screw fix wall profile to wall. **Fig 2.**

3. Insert the screen into the wall profile. Ensure the bottom edge of the moving panel is parallel to the top surface of the bath. **Fig 3.**

**FIG 4**

**FIG 5**

4. Drill 3 holes through the wall profile and fixed panel using a 3.0mm steel drill bit. Using the screws, fix the screen upright to the wall profile in 3 places. **Fig 4.**

5. Attach the cover strip to the wall profile. Starting at the bottom firmly press cover strip into place and gradually work from bottom to top **Fig 5.**

6. Fix the top cover cap (B08062) to upright profile and top cover cap (B08060) to wall profile (M7003). **Fig 6.**

**FIG 6**

7. Position moving panel at 90 degrees to the fixed panel. Starting at the bottom push on magnet seals fully. Open the moving panel and ensure both seals meet fully and provide a complete seal. If there is a gap push both seals together. **TIP!** Leave a slight gap between the bath top and the bottom of the moving panel seal. **Fig 7.**

**FIG 7**

8. Fix the cover cap(M7012) to both hinge. **Fig 8.**

**FIG 8**

9. Fix the bottom seal. **Fig 9.**

**IMPORTANT:** Ensure bottom seal is tight to bath top surface along the screen. Keep deflector fin to inside.

**FIG 9**

**FIG 10**

10. Fix the luna rail on top of bath. Put a dab of silicone to bottom of each luna rail end cap (note left & right) and a thin bead of silicone to the bottom of the luna rail. Fit cap to end of fixed panel and carefully place luna rail into end cap. Ensure the luna rail is parallel to the bath edge. **Fig 10.**

**FIG 11**

11. Sealing. **Fig 11.**

**Inside(dashed line):**

When installation is complete seal the joint between the wall profile and the wall, top to bottom on the inside only. **SEAL** where the wall profile and fixed panel sit on the bath.

**Outside(full line)**

From outside the screen, Seal along the bottom where the fixed panel, frame and wall profile meet the bath. Seal 50mm up where the frame meets the wall profile and where the wall profile meets the wall.

DO NOT USE THE ENCLOSURE FOR 24 HOURS AFTER SEALING
