

DOUCHE002

INSTRUCTION MANUAL

## IMPORTANT:

This douche is class a fluid category 5 product please follow water regulations.

We don't expect this to be a pressurized installation.

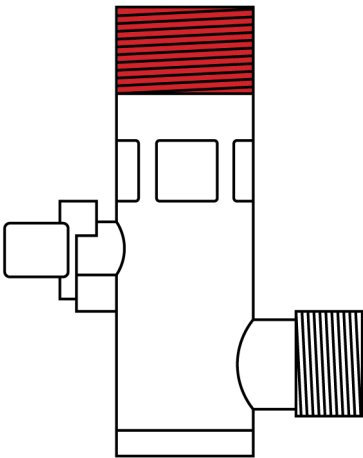

Please ensure water isolation whilst installing this product.

## Tools needed:

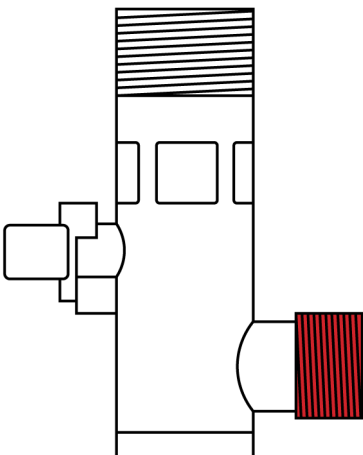

- Drill
- Adjustable spanner
- PTFE tape
- Screwdriver

## Installation Instructions:

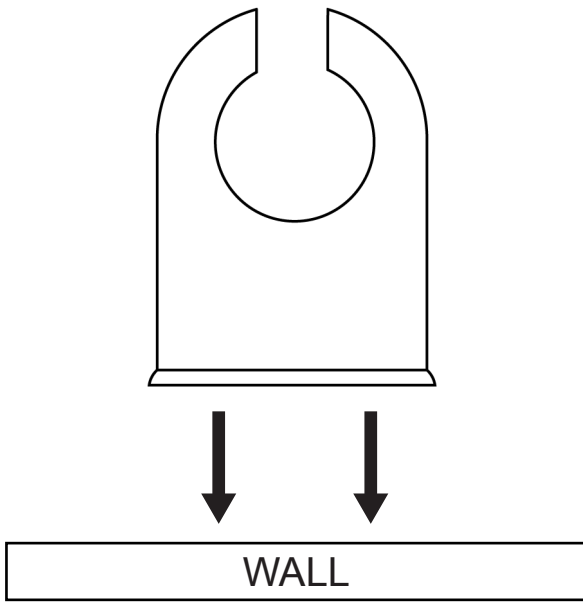

1. Terminate into a back plate elbow behind (back plate elbow not supplied).
2. Use PTFE tape on shut off valve and attach to back plate elbow.

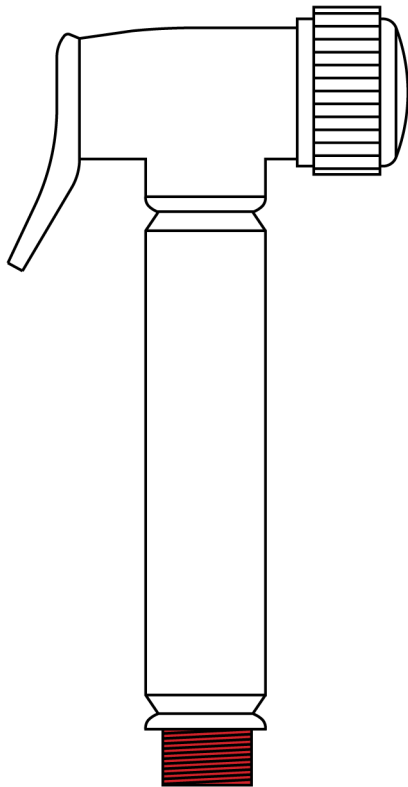

3. Use spanner to install hose onto shut off valve.

4. Make drill marks and use drill on said marks.
5. Attach wall bracket to wall.

6. Attach douche gun to hose.

## IMPORTANT:

When not in use turn off shut off valve. The gun is to control the flow of water not to stop water for long periods of time.
