Once you know your outputs you can also use the brochure to specify your radiator by following these steps (or call our Customer Services team on 01342 302250 who will help you size your radiator)

Note the space you have in mind for the radiator(s) you need; vertical or horizontal, length, height & depth

- Select a column option and height that fits your space; Calculate the number of Sections you need by dividing the required BTU (Watt) output with the output per section; e.g  $4811 \text{ BTUs divided by } 420 = 11.45$ , (we always suggest rounding up, as it is better to have too much output, than too little) therefore 12 sections based on Vip 590
- If using that section size does work in the space available, try a different height or alternative aluminium profile
- Once you have calculated the best number and size of section, select your colour. Our Aluminium Radiators are now available in a selection of the top 25 most popular colours from the RAL range and 32 special finishes (shown right on page 161). Please specify your RAL colour or special finish at time of order. White RAL 9010 is our standard for the Vip, Oscar, Vox and Mix, RAL 9016 for the Ottimo.
- Work out the price of your radiator by multiplying the section price by the total number of sections e.g Vip 590 high, 12 sections in white =  $\pounds 34.64 \times 12 = \pounds 415.68$  (inc VAT)
- Place your order by using the Sectional Model Code x No. of Sections needed and noting the colour number and name selected; e.g VIP59 X 12 in White RAL 9010
- If you have chosen a colour make sure you list the colour number and name

All prices and outputs are given per section in the tables on pages 162-171. Price per section includes plugs, bushes and diverter.

End Panels for the Vip & Oscar must be specified at time of order, please see pages 163 and 165 for more information.
